## Antonelli Landscape Creates Complete Hardscape for Outdoor Living with Unilock Products in St. Clair, MI

This waterfront property in St. Clair, Michigan, looks like a luxurious resort after a complete redesign by Unilock Authorized Contractor, Antonelli Landscape. The new multi-level patio features Umbriano pavers in Winter Marvel with striking borders using Town Hall pavers in Basalt. Steps and planters are built with Rivercrest Wall in Coastal Slate which helps to highlight the change in levels. Corner pillars and landscape walls are finished with natural Limestone coping in Black River to coordinate with the dark borders.

The backyard renovation gives the clients a complete outdoor living space that includes an outdoor kitchen, dining room and sitting area. The design also incorporates a pool and hot tub in a separate fenced area. A modern fire table rounds out the amenities, creating a patio ready for entertaining that easily transitions from day to night.

The clever design makes excellent use of a sloped landscape by creating a tiered patio with strategically placed flower beds that help disguise the grade. Large boulders act as a natural retaining wall and a row of tall trees adds privacy around the pool. Bright pops of color are introduced in the flower beds and carried across the patio furnishings and umbrellas for continuity.

Umbriano pavers feature EnduraColor Plus and EasyClean technologies, ensuring a durable finish that looks beautiful and repels stains. They are also resistant to the effects of both chlorine and salt, making them ideal for use in patios, pool decks, walkways and driveways. Their clean lines and mottled colors provide just the right look for contemporary landscapes.

---

With five compatible sizes, Umbriano pavers can be configured in a variety of laying patterns to create different looks. Pattern sheets in PDF or PAT format are available on the Unilock website. Note that a vacuum placement tool is recommended when placing the large 16" x 16" or 24" x 24" stones. The Unilyft paver laying assist machine is ideal for this purpose.

Town Hall Pavers offer the classic look of clay bricks infused with the durability and rich colors of EnduraColor Plus technology. Their realistic appearance is a result of the Reala casting process which uses real bricks to create molds for casting. Town Hall pavers feature Anchorlock design with six locking sides that provide unparalleled strength and load capacity.

Unilock Premium Quality Limestone provides excellent freeze-thaw durability and low water absorption, making it an excellent choice for use in all climates. The upscale beauty of Limestone is the perfect finishing touch for this stunning patio. For more information, see the Limestone product data sheet, available on the Unilock website, which provides detailed unit sizes and laying patterns.

This substantial backyard renovation transforms a large, sloped landscape into an outdoor oasis ready for relaxing or entertaining. Constructed entirely of Unilock products, this project demonstrates how quality materials and a skilled contractor can create a dream destination right in your backyard.
